

PLANT SCHEDULE			
SYMBOL	COMMON / BOTANICAL NAME	CONT	QTY
<b>NATIVE TREES</b>			
	Canadian Serviceberry Multi-trunk / <i>Amelanchier canadensis</i>	7 gal	1
	Eastern Redcedar / <i>Juniperus virginiana</i>	4-5'	2
<b>NATIVE GRASSES</b>			
	Little Bluestem / <i>Schizachyrium scoparium</i>	1 gal	71
<b>NATIVE PERENNIALS</b>			
	Butterfly Milkweed / <i>Asclepias tuberosa</i>	1 gal	19
<b>NATIVE SHRUBS</b>			
	Arrowwood Viburnum / <i>Viburnum dentatum</i> 'Arrowwood'	3 gal	3
	Beach Plum / <i>Prunus maritima</i>	3 gal	26
	Carolina Rose / <i>Rosa carolina</i>	3 gal	22
	Northern Bayberry / <i>Myrica pensylvanica</i>	3 gal	66

**PLAN NOTES**

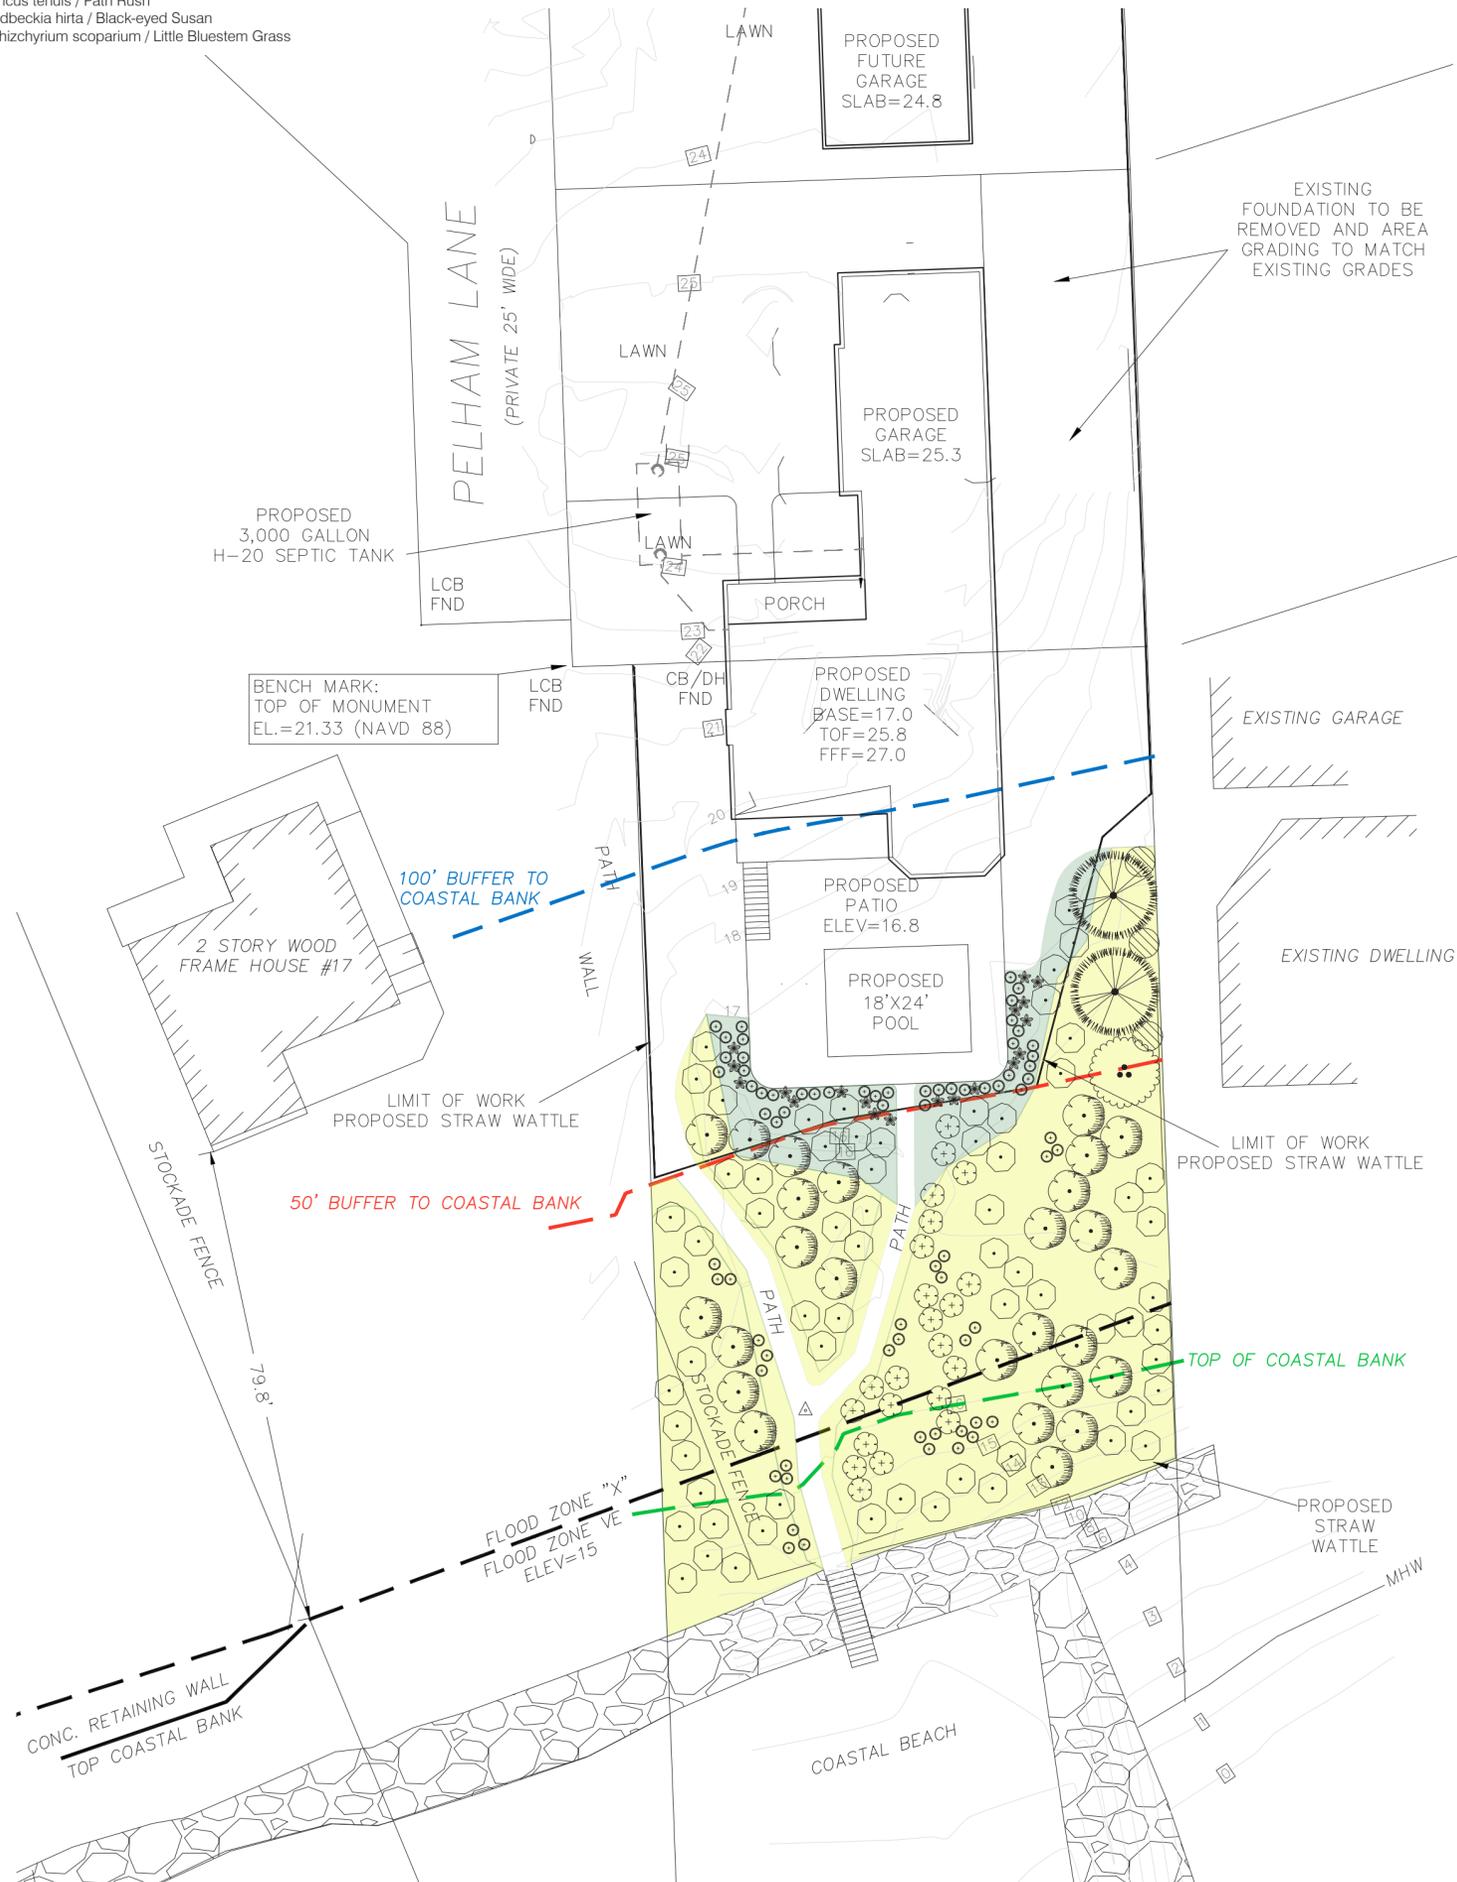

- Site plan provided by BSC Group.
- This plan proposes invasive species management and native plant restoration in a total of approximately 7,052 square feet.
- Invasive species on site that will be managed/removed include Asiatic bittersweet (*Celastrus orbiculatus*), shrub honeysuckle (*Lonicera spp.*), and vine honeysuckle (*Lonicera japonica*). Invasive plants will be selectively treated with an EPA-approved systemic herbicide and removed mechanically or by hand.
- Lawn and landscape mulch will be removed.
- Native vegetation, including bayberry and beach plum shrubs, that have been damaged by invasive species or historic pruning may be regeneratively pruned using best management practices to promote healthy regeneration and vigorous growth.
- After invasive species removal the project area will be seeded with a native grass and wildflower mix (see above right).
- The management areas will be planted with a total of 3 native trees, 110 native shrubs, 71 native grasses, and 19 native perennials. (see Plant Schedule below for details)
- All vegetation debris will be removed from the site and brought to an off-site disposal area.
- The location of the plantings are approximate. The plants will be planted in open, unvegetated spaces left after invasive removal.
- Temporary irrigation will be required for the first two to three growing seasons while plants establish. Drip irrigation to be used on all shrubs, grasses, and perennials. Once plants are established irrigation will be removed.
- Follow up invasive species management will be ongoing over the next three growing seasons to ensure proper management and successful restoration.

**PROJECT AREA**

Google Earth aerial image of 18 Pelham Drive in Dennis.

**GRASS & WILDFLOWER SEED MIX**  
 Agrostis perennans / Autumn Bentgrass  
 Asclepias tuberosa / Butterfly Milkweed  
 Echinacea purpurea / Purple Coneflower  
 Festuca ovina / Sheep Fescue  
 Festuca rubra / Red Fescue  
 Juncus tenuis / Path Rush  
 Rudbeckia hirta / Black-eyed Susan  
 Schizachyrium scoparium / Little Bluestem Grass
